| Heating function     | Silicone plate heating              |
| voltage              | 110V/220V optional                  |
| Electrical reference | Rated current 4A, rated power 1.2KW |
| Machine dimensions   | L770 * W510 * H120 (mm)             |
| Packaging size       | L800 * W540 * H160 (mm)             |
| Net weight           | 20KG                                |
| Gross weight         | 25KG                                |
| Powder               | 1200W                               |

### Notes:

1. The power supply voltage should be within a reasonable range and the power supply should be grounded properly to ensure the normal and stable operation of the equipment and the personal safety of operators;
2. The fluctuation range of the power supply voltage of this device should be less than  $\pm 5\%$ . If the voltage is too low, it will affect the working efficiency of the equipment. If the voltage is too high, it will shorten the service life of key components of the equipment. It is recommended that users with conditions install a voltage regulator.
3. If not used for a long time, unplug the power plug in a timely manner;
4. This product must be installed horizontally to ensure that the equipment is not shaking during operation;
5. The quality of produced products requires appropriate temperature and working speed coordination. A good working environment can significantly improve the service life of equipment and produce more stable products;
